ABSTRACT

This guide lists favorably reviewed microcomputer software for K-12 student instruction. It is not intended for use as a buying guide, but as an aid to educators in locating commercially available software they may want to preview to determine its suitability for their instructional program and students. Each annual edition of this guide is an independent publication and includes titles from earlier editions only if they meet the criteria established for the current year. Individual programs are listed alphabetically by title within a curriculum area, and each listing includes the publisher, microcomputers the program can be used with, instructional mode, grade level, and price. The 20 areas represented are art, business education, computers, electronic periodicals, foreign language, home economics/living skills, health, instructional tools, keyboarding, language arts/English, library media skills, mathematics, music, preschool/early childhood, problem solving/logic, science, special needs/physically handicapped, social studies, testing, and vocational education/industrial arts. The guide also includes a list of consortium member institutions; a key to the abbreviations used; an alphabetical listing of software titles with the name of the publisher, microcomputer, curriculum area, and price; and a directory of publishers represented in the guide. 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE

developed by the

EDUCATIONAL SOFTWARE EVALUATION CONSORTIUM

The 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE is a list of favorably reviewed microcomputer software for K-12 student instruction. It is NOT a buying guide. It has been developed solely as an aid to educators in locating programs they may want to preview. Consortium participants recommend that all software be previewed by educators to determine its suitability for their instructional program and students.

The 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE has been developed by the Educational Software Evaluation Consortium, representing 29 organizations involved in computer education throughout North America. The titles in this guide have been favorably reviewed at participating sites. Placement of a title on a list and into specific subjects, grade levels, and instructional modes reflects the best judgment of Consortium participants.

This guide is not all-inclusive. It includes only commercially available software for K-12 student instruction. Titles not included in the guide fall into the following categories: not yet widely reviewed, unfavorably reviewed, or falling outside specified categories. Each annual edition is an independent publication and includes titles from earlier editions only if they meet the criteria established for the current year.

While a given product is often available for several microcomputers, the version reviewed here may be of a different quality than those for other machines.

Development of the 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE was one of the major purposes of the California TECC Software Evaluation Forum, held at Vallombrosa Center in Menlo Park, California, December 2-6, 1985. The Forum was sponsored by the TECC Software Library and Clearinghouse in the San Mateo County Office of Education. The California State Department of Education has funded this project as part of the California TECC (Teacher Education and Computer Center) program. Additional financial support for the Educational Software Evaluation Consortium is provided by Phi Delta Kappa and the participating organizations.

The 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE is copyrighted by the California State Department of Education. Quoting, excerpting from, or reprinting any portion of it for commercial purposes is strictly prohibited. Specifically, no advertising of titles as having appeared in the 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE will be permitted. Any title so advertised will be deleted from the list.

Permission for reprinting and distributing the 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE, including electronic distribution, is granted to:

(1) All sites and agencies participating in the Educational Software Evaluation Consortium, and

(2) Public governmental agencies, with written consent of the California State Department of Education.

Except as stated in (1) and (2) above, the 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE may not be reprinted in any publication other than the official publication of a participating site or organization. All reproductions of the 1986 EDUCATIONAL SOFTWARE PREVIEW GUIDE must include this preface and must be printed either in whole or by complete subject-area sections. No titles may be added to or deleted from any section.
